BONUS 2

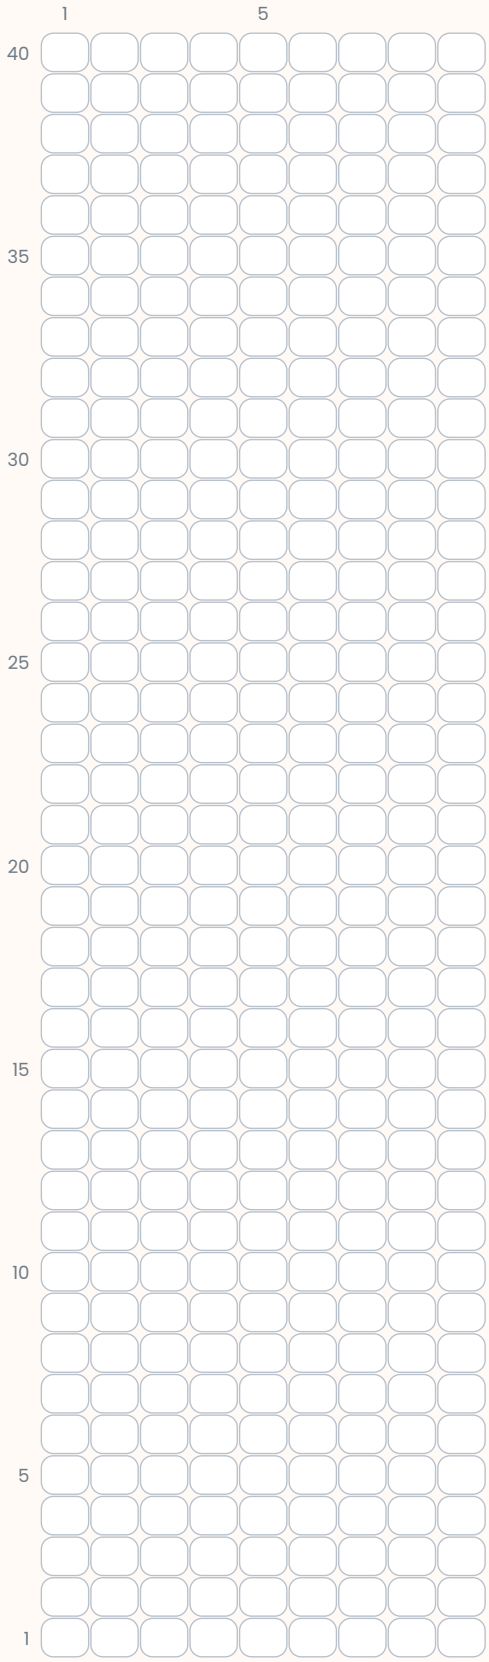

Your blank chart library

Print these grids, color them in with pencils or markers, and count each color before you buy beads. Row numbers run bottom to top; column numbers run left to right. Use a different grid for each stitch so your chart matches how the beads sit.

> **DESIGN ROUTINE**
> 1) Pick a palette (Palette Planner page). 2) Draw a half motif and mirror it. 3) Count beads per color. 4) Stitch a short test strip. 5) Adjust and save the chart.
